Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Huang et al.

(US 6,151,582).

Huang et al. teaches a method for monitoring available resources in a production process with supply links where components are supplied by a number of supply links to a system provider which puts these components together to form a system. The supply links are situated in relation to one another in an interconnected supply chain (Figures 4 and 5). These structural data elements are spatially distributed along the supply chain 58 (See Figure 5). The relationship between these nodes is preferably modeled in the form of a network (column 6, lines 65-67).

The supply stage is identified according to its process stage. The information concerning the demands of the system provider in their time sequence is made available by the system provider continually over time to each supply link (Figures 12,13,14,16,17,19). In the manufacturing context, Demand Management regroups the set of processes by which the user analyzes Market Data 140 and past demand history for the purpose of estimating future demand requirements (column 19, lines 32-35).
